Professional Summary

Dedicated to solving business problems with data, I have developed a practical foundation in Python, SQL, and machine learning model development. My experience includes performing exploratory data analysis, data cleaning, and reporting to ensure data accuracy. I am proficient in Power BI for transforming raw datasets into interactive dashboards and leverage Streamlit to package and deploy machine learning models into interactive, user-facing web applications.

Technical Skills

Programming Languages: Python, SQL

Python Libraries: NumPy, Pandas, Scikit-learn

Machine Learning: Random Forest, Logistic Regression, K-Means, XGBoost, Model Evaluation, Machine Learning, Linear Regression, Decision Trees

Data Analysis: Cleaning, Hypothesis Testing, Statistical Analysis, EDA

Data Visualization: Power BI, Matplotlib, Seaborn

Databases: PostgreSQL, MySQL

Version Control: Git, GitHub

Tools: Excel, VS Code, Jupyter Notebook, Google Colab

Core Concepts: Statistics, Probability

Other: Streamlit

Projects

Phishing Prediction Model

Python, Machine Learning, Streamlit

- Built a machine learning solution to detect phishing websites and protect users from credential theft, engineering URL-based features and performing feature selection.
- Evaluated models using manual methods and Microsoft's FLAML library, with XGBoost achieving the best performance with 94% accuracy on unseen data.
- Deployed the machine learning model via a Streamlit app to enable real-time phishing detection for browser security and email filtering systems.

Cement Concrete Strength Model

Python, Machine Learning

- Performed advanced EDA and statistical modeling to quantify curing-rate correlations and transform raw data for concrete compressive strength prediction.
- Architected a predictive pipeline using XGBoost and integrated DVC for automated data lineage and reproducibility.
- Achieved 91% predictive accuracy and successfully forecasted 28-day structural integrity from early-age data.

Education

B.E. — University of Mumbai, India

2021 - 2025

Field of Study: Computer Engineering | Grade: 7.01/10.0 **Higher Secondary Certificate (H.S.C.)** — Maharashtra State Board

2019 - 2021

Grade: 85.5% **Secondary School Certificate (S.S.C.)** — Maharashtra State Board

2019

Grade: 70.0%

Certifications

- Deloitte Data Analytics Job Simulation (2025)
- SQL Mastery, IT Vedant (2025)
- Power BI Essentials, IT Vedant (2025)
- Python Essentials for Data Science, IT Vedant (2025)
