

Senior Software Engineer (Backend)

TechNova Solutions | Location: Remote (US) | Employment Type: Full-Time

About TechNova Solutions

TechNova Solutions is a leading provider of cloud-based enterprise software. We are on a mission to empower businesses with scalable, secure, and intuitive data management platforms. Our team is passionate about solving complex engineering challenges and fostering an inclusive, innovative culture.

Role Overview

We are seeking a highly skilled and motivated Senior Backend Software Engineer to join our Core Platform team. In this role, you will be responsible for designing, developing, and maintaining high-performance microservices that power our flagship product. You will collaborate closely with cross-functional teams, including product managers, front-end engineers, and QA, to deliver robust and scalable solutions.

Key Responsibilities

- Design, build, and maintain efficient, reusable, and reliable backend code using Python and Go.
- Architect scalable microservices and RESTful APIs to support web and mobile applications.
- Optimize applications for maximum speed, scalability, and high availability.
- Integrate user-facing elements developed by front-end developers with server-side logic.
- Participate in the entire software development lifecycle, from concept and design to testing and deployment.
- Mentor junior engineers and conduct rigorous code reviews to maintain code quality standards.
- Collaborate with DevOps to streamline deployment pipelines and monitor system health.

Required Qualifications

- **Education:** Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- **Experience:** 5+ years of professional experience in backend software development.
- **Core Languages:** Strong proficiency in Python, Java, or Go.
- **Database:** Extensive experience with relational databases (PostgreSQL, MySQL) and NoSQL databases (MongoDB, Redis).
- **Cloud:** Hands-on experience with cloud platforms, preferably AWS (EC2, S3, RDS, Lambda).
- Solid understanding of object-oriented programming, design patterns, and data structures.
- Experience with containerization and orchestration tools (Docker, Kubernetes).

Preferred Qualifications

- Experience building and scaling event-driven architectures (Kafka, RabbitMQ).
- Familiarity with CI/CD pipelines (Jenkins, GitHub Actions).
- Knowledge of web security best practices and compliance frameworks (SOC2, GDPR).

Benefits & Perks

- Competitive base salary (\$140,000 - \$180,000) and annual performance bonus.
- Comprehensive health, dental, and vision insurance.
- 401(k) matching program.
- Unlimited Paid Time Off (PTO) and flexible working hours.
- Annual stipend for professional development and home office setup.
