Professional Summary

Dedicated to solving business problems with data, I have developed a practical foundation in SQL and Python. My experience includes performing Exploratory Data Analysis (EDA) and data cleaning to ensure accuracy in reporting. I am proficient in Excel and Power BI for transforming raw datasets into interactive dashboards and Actionable Insights. I apply Statistical Analysis techniques to identify trends and ensure the reliability of findings to help a team make informed business decisions.

Technical Skills

- **Programming Languages:** Python (Proficient), SQL (Intermediate)
- **Python Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Machine Learning:** Linear Regression, Logistic Regression, Decision Trees, Random Forest, K-Means
- **Data Analysis:** Cleaning, EDA, Statistical Analysis, Hypothesis Testing
- **Data Visualization:** Power BI, Matplotlib, Seaborn, Plotly, Tableau
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Version Control:** Git, GitHub
- **Tools:** Excel (Pivot Tables, VLOOKUP, Power Query), Jupyter Notebook, Google Colab, VS Code, Anaconda
- **Core Concepts:** Probability, Statistics, Model Evaluation

Projects

Phishing Prediction Model

Python | Machine Learning | Streamlit

- **Problem:** Built a **machine learning solution** to detect phishing websites and protect users from credential theft, addressing a critical cybersecurity threat.
- **Data Processing:** Engineered **URL-based features** (length, special characters, subdomains, HTTPS) and performed **feature selection** to optimize model performance.
- **Model & Deployment:** Evaluated models using both manual methods and Microsoft's **FLAML** library; **XGBoost** achieved best performance with **94% accuracy**. Deployed via **Streamlit app**.
- **Results & Impact:** Achieved **94% accuracy** on unseen data, enabling real-time phishing detection for browser security and email filtering systems.

Cement Concrete Strength Model

Python | Machine Learning

- **Problem:** Predicted **concrete compressive strength** to optimize material costs and accelerate quality assurance cycles.
- **Data Processing:** Performed **advanced EDA and statistical modeling** to quantify curing-rate correlations and transform raw data.
- **Model & Deployment:** Architected a **predictive pipeline using XGBoost** and integrated **DVC** for automated data lineage and reproducibility.
- **Results & Impact:** Achieved **91% predictive accuracy** and successfully forecasted **28-day structural integrity** from early-age data.

Bank Loan Prediction

Snowflake SQL | Power BI

- **Problem:** Analyzed **loan portfolio risk** by identifying default patterns and assessing financial risk for improved decision-making.
- **Data Processing:** Processed **500+ loan records** using SQL queries, performed data cleaning, transformation, and prepared datasets for analysis.
- **Model & Visualization:** Developed a **risk scoring system** and engineered an **automated Power BI dashboard** with **8+ visualizations**.
- **Results & Impact:** Achieved **85% default probability correlation** and reduced **manual reporting time by 70%**.

Education

B.E. Computer Engineering

University of Mumbai, India

2021–2025

CGPA: 7.01/10.0

Higher Secondary Certificate (H.S.C.)

Maharashtra State Board

2019–2021

Percentage: 85.5%

Secondary School Certificate (S.S.C.)

Maharashtra State Board

2019

Percentage: 70.0%

Certifications

- **Deloitte Data Analytics Job Simulation** (2025)
- **SQL Mastery**, IT Vedant (2025)
- **Power BI Essentials**, IT Vedant (2025)
- **Python Essentials for Data Science**, IT Vedant (2025)
